Heritage Status

Legend

- Part IV
- Listed

The Toronto West Junction HCD Study Area contains 15 buildings listed on the City of Toronto's Heritage Register and 6 buildings designated under Part IV of the Ontario Heritage Act.

Most of these heritage buildings are distributed between Keele Street and High Park Avenue on Dundas St W, with the exception of 2694 Dundas Street West, located at the east end of the

Study Area Boundary. There is a cluster of heritage buildings located at the intersection of Keele and Dundas streets.

Current Condition: Number of Storeys

Legend

- 1
- 2
- 3
- 4
- 5
- 6
- 8+

Building storeys in the West Junction HCD Study Area range from 1 to 10 storeys. The Study Area has predominantly low-rise (1-3 storey) structures, comprising 96% of the existing building stock. There

are six properties ranging from 4-6 storeys located throughout the Study Area, with a slight concentration around Indian Grove and Gilmour Avenue.

All buildings 8 storeys or more are currently being constructed or were constructed in the 21st century. These buildings are located throughout the Study Area.

Dates of Construction

Legend

Red	-1899	Light Green	1960-1979
Orange	1900-1919	Dark Green	1980-1999
Yellow	1920-1939	Blue	2000+
Light Yellow	1940-1959		

The date of construction of buildings within the Study Area ranges between 1885 to present day, reflecting the evolving nature of the district. With the exception of 3150 Dundas St W, all extant buildings in the Study Area were constructed after the incorporation

of the Village of West Toronto (1887). Almost 50% of the buildings were constructed between 1900-1919, and almost 70% of the existing buildings in the Study Area were constructed before 1920. Development began to slow in the mid-twentieth century

with infill projects throughout the Study Area. A slight development resurgence occurred during the 1960s and post 2000. The construction dates of the existing built fabric reflect the historic waves of development in the Study Area.

Current Land Use

Legend

- Commercial
- Mixed-use
- Residential
- Institutional

The Study Area has a wide variety of commercial, mixed-use, residential, and institutional buildings within its boundaries. There is a high concentration of commercial and mixed-use buildings along Dundas Street West. Most mid-rise residential

buildings incorporate commercial uses at street level. Similarly, commercial storefronts often include residential usage in their upper storeys. Institutional uses are spread out throughout the Study Area with the exception of a cluster of public and

private institutions on Keele Street, south of Dundas Street West. The western portion of the Study Area, between Gilmour Avenue and St. John's Road/Place, has the highest concentration of purpose-built residential buildings, typically semi-detached.

Architectural Stylistic Influences

- Legend**
- Italianate
 - Second Empire
 - Queen Anne Revival
 - Edwardian Classical & Residential Edwardian
 - Neo-Gothic Revival
 - Vernacular (late 19th-early 20th C. Main Street)
 - Art Deco, Art Moderne
 - Modernist
 - Vernacular (mid-to-late 20th C. Main Street)
 - New Traditional
 - Contemporary

The West Toronto Junction HCD Study Area includes a variety of architectural styles as a result of the area's evolution from an early-20th century main street to a 21st century urban neighbourhood.

The predominant style, a vernacular late 19th to early 20th century main street, is characteristic of Toronto main streets. It is defined by 2-3 story construction with Victorian or Edwardian embellishments

and storefronts that create a porosity at grade that contributes to the animation of the street wall.
